EXPERIENCE

Forward Deployment Engineer, Cornerstone OnDemand, Hyderabad, India. June 2026 to present.

- Extended the Skills Architect Agent (agentic AI layer of Cornerstone Workforce AI) to reason over a customer's own proprietary data, not only Cornerstone's built-in sources; Java, Spring Boot, React.
- Own features end to end, from design to production, in a multi-tenant stack with tenant-isolated schemas, a JWT API gateway and SAML2 SSO.

Software Developer, HCLTech, India. August 2025 to May 2026.

- Built and shipped an AI document processing framework on Azure that took over work previously done by hand by a document review team.
- Added confidence scoring, hallucination guardrails and a fault-classification feedback loop that cut edge-case failures by 30% without retraining.
- Built automated test suites with the QA team that cut manual testing effort by 60%.

Research Intern, Machine Learning, BITS-ON Research Group, IIIT-Delhi, New Delhi. January 2025 to July 2025.

- Built a DNN classifier for fault localization on a 400 km C+L band optical testbed with 96 WDM channels.
- Took accuracy from 70% to 95% and F1 to 0.98 across 8 fault classes through feature engineering; see Publications.

PROJECTS

AAItrade, Autonomous Trading Agent (2026). <https://github.com/Aditya-0156/AAItrade>

- An LLM reasons over live NSE market data, indicators and news through multi-step tool calls; independent risk controls (stop-loss, position limits, drawdown halt) override its decisions.
- Rejected trades return the reason and a corrected maximum quantity in the same cycle; paper and live share one code path; full decision history in SQLite for crash recovery.

RAG Document Q&A System (2025). <https://github.com/Aditya-0156/RAG>

- Lets a user ask questions of their own PDF, DOCX, TXT and Markdown files from a CLI or a drag-and-drop web UI. Semantic search returns matching passages in under a second.

PUBLICATIONS

- Co-author, "Demonstration of Soft-Failure Localization in C+L Band Optical Testbed: A Deep-Learning Assisted Approach," IEEE ANTS 2025. Best Paper Award, Demos and Exhibits.
- Co-author, "Experimental Investigation over 400 km C+L Band Optical Testbed for Quality of Transmission Estimation Using Machine Learning," IEEE ANTS 2024.

EDUCATION

B.Tech in Computer Science Engineering, IIIT-Delhi. August 2021 to June 2025. GPA 7.5/10.

SKILLS

- Languages: Java, Python, TypeScript, SQL.
- AI and ML: LLM agents and tool use, Claude API, Azure OpenAI, LangChain, ChromaDB, RAG, scikit-learn, TensorFlow/Keras, pandas, NumPy.
- Platforms and tools: Spring Boot, React, Flask, FastAPI, PostgreSQL, MongoDB, ClickHouse, Redis, SQLite, Azure, Git, Linux, CI/CD.
- Familiar: C/C++, PyTorch, Hugging Face, Docker.
